What is a nutrition profile?

Some of the most important decisions you make about feeding your family are made in the grocery store. Many food companies and grocery stores are trying to help simplify the process by offering rating systems called nutrition profiling.

While you know that good nutrition is important for growing children and for keeping yourself healthy, sometimes making the right choices can seem overwhelming, especially at the store, where you are often hurried and distracted. Reading labels can be daunting and time consuming. Nutrition profiles are designed to help make your job easier.

Nutrition profiling is intended to help consumers identify “nutrient-rich” foods more easily. Each program uses different combinations of factors like fat, sodium, cholesterol, added sugars, vitamins, minerals, fiber, and calories.

What’s the Score? Nutrition profiling is not an exact science. It is intended to help consumers choose foods with more health-promoting nutrients per serving. Choosing nutrient-rich foods like vegetables, fruit, lean meats, low-fat dairy and whole grains more often will help maintain and improve health.

### Perdue Perfect Portions® Skinless Boneless Chicken Breast

**Nutrition iQ™**

**GENERAL INFORMATION**
- Designed to highlight each food item's top one or two nutritional benefits
- Identified with color-coded shelf-tag bars: Yellow (excellent or good source of protein); Dark Green (low or healthier level of sodium); Purple (low calorie); Red (low saturated fat); Blue (excellent or good source of calcium); Orange (excellent or good sources of fiber) and Dark Orange (whole grains)
- Excludes food categories including seasonings, beverages, dietetic foods, oils and shortenings, candy/gum/mints, cookies and ice cream, ice, molasses, baby food and soft drink mixes
- Designed for Supervalu grocery stores

**SCORING**
- Based on a complex formula using more than 30 nutrients based on the Dietary Guidelines for Americans and the Institute of Medicine's Dietary Reference Intakes (DRIs) as well as nutrients thought to promote health such as B vitamins, omega-3 fats, antioxidants, and protein quality
- All foods are scored using the same formula to allow people to compare not only like categories (e.g. cereals) but also different categories (e.g. vegetables and meats)
- Does not consider serving size in the score
- Not all food categories have foods with a score of 100 (i.e. the highest scoring fresh meat is skinless turkey breast with a score of 48)
- The “health promoting” nutrient total score is divided by the “non-health promoting” nutrient total score for the Nutrition iQ™ score

**NuVal™**

**GENERAL INFORMATION**
- Rates foods and beverages ranging from 1 to 100 using the Overall Nutrition Quality Index (ONQI)
- Higher scores indicates “healthier” foods
- Located on the grocery store shelf, not the package
- Supermarkets pay a fee in order to use NuVal™ in their stores

**SCORING**
- Based on a complex formula using more than 30 nutrients based on the Dietary Guidelines for Americans and the Institute of Medicine's Dietary Reference Intakes (DRIs) as well as nutrients thought to promote health such as B vitamins, omega-3 fats, antioxidants, and protein quality

**Healthy Ideas®**
www.martinsfoods.com
www.giantfood.com
www.stopandshop.com

**General Information**
- Based on national and international dietary recommendations including the Dietary Guidelines for Americans
- Provides nutrition ratings of all foods in the store with 5+ calories per serving
- Excludes bottled water, alcoholic beverages, coffee, tea, and spices
- Supermarkets pay a fee in order to use Guiding Stars® in their stores

**Locations**
Hannaford®
Food Lion®

**Guiding Stars®**
www.guidingstars.com

**General Information**
- Based on a nutrition threshold, not a formula
- Excludes foods not considered to be an important source of a nutrient
- About 28% of grocery store food items qualify for the Healthy Ideas® symbol
- Placed on the qualifying food item's packaging or indicated with shelf tags/signage
- Developed exclusively for Ahold USA Retail grocery stores

**Scoring**
- Uses four different formulas due to nutrient differences between foods: baby/toddler foods; fats and oils; poultry/meats/seafood/dairy/nuts; and general groceries including whole grains
- Breaks down the scores into four categories: zero, one, two or three stars
- Uses nutrition data from the USDA National Nutrient Database for single ingredient or foods that are a single ingredient plus water, fresh vegetables and fruits, and fresh meats
- Based on 100 calorie serving sizes

**Locations**
GIANT® Food Stores of Carlisle, Pennsylvania
Giant Food® Stores of Landover, Maryland
MARTIN's Food Markets
Stop & Shop®

**Healthy Ideas®**
www.martinsfoods.com
www.giantfood.com
www.stopandshop.com

**General Information**
- Based on the Dietary Guidelines for Americans, MyPyramid, and the Code of Federal Regulations (ensures nutrient claims are science-based)
- Includes food categories from MyPyramid
- Includes only foods classified as “healthy” by the FDA (low in fat and saturated fat, limited in cholesterol and sodium) and provides at least 10% of the Dietary Reference Intakes (DRI) for at least one of the following: fiber, protein, calcium, iron and vitamins A or C
- Dairy, dried and canned fruits, cereals and snacks must meet the “healthy” and DRI requirements as well as the limits for total sugars per reference amount customarily consumed.
- All fresh fruits and vegetables qualify (except coconuts and avocados)

Because each profile uses different factors and formulas to create a “score,” each system is different. Many grocery stores have chosen to use only one program, so if you always shop at the same store, once you learn how it works, shopping should become easier.
